Abstract of the Disclosure

A shoulder mount for a flashlight has a shoulder mount assembly, a ball joint, and a flashlight retaining member. The shoulder mount assembly has a rigid plate that rests on the top of the user's shoulder. A square base plate has an arm at each corner, the arm rising at a ninety degree angle in side profile and rising inwardly at a roughly seventy degree angle in front profile. The arms each have a compression spring, the springs holding up a pair of shafts, and the shafts support a pair of rollers. The rollers are located above the center line of the barrel of a flashlight so that the rollers removably retain the flashlight. The flashlight base plate has a mating ball joint centrally attached to its lower surface allowing the flashlight retaining member to be angled up or down or swiveled from side to side.

A handwritten signature in black ink, appearing to be 'S. H.', is written over a faint, circular official stamp. The stamp contains some illegible text, possibly 'EXAMINED' and 'JAN 10 2011'.

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Michael Shippey on 30 October 2003.

3. The application has been amended as follows:

Please cancel the abstract and insert the new abstract on the attached sheet.

This amendment is necessary to shorten the abstract to conform with current requirements.
